2022-2023

1. Project Title: Online Distilled Water

2. Abstract: The proposed project on **Online Distilled Water** is an online application designed to deal with the sales and purchasing of Mineral Water. It enhances the process of recording details and online order of the Mineral Water and it delivered to the customer's home.

3. Objective:

1. The main objective of **Online Distilled Water** project is to sell and purchase Distilled water in online.

2. The **Online Distilled water** application will help to the customer to give information about the Mineral Water and customer can make the order of his need products.

3. **Online Distilled Water** web application it user friendly application for both customer and seller.

4. In **Online Distilled Water** project customer can purchase products either online payment or cash on delivery and also customer can track the ordered products.

4. **Introduction:** The **Online Distilled Water** project is consists of following modules and Forms.

1. Admin Module: In Admin Module Forms are

- Dashboard
- Product
 - Add
 - View/delete/update
- Orders
- Reports
- Feedbacks
- Change Password
- Customer/View/Delete

2. Customer Module: In Customer Module Forms are

- Customer Home
- Profile
- products
- My Orders

- Bill/Reciepts
- Feedback
 - Live
 - view
- Change Password

5. **Existing System and its Disadvantages:** In Existing System customer is completely depending on the manual process for buying the mineral water.

Disadvantages of Existing System:

- 1.For Customer it's more time consuming to go and purchase the mineral water manually.
- 2.For mineral water provider and customer it is difficult to manage paper work.
3. when customer approaches for manual shopping directly, he/she does not have an idea about things like price range , items etc.

6. **Proposed System and its Advantages:** In proposed system customer can buy mineral water in online.

Advantages of Proposed System:

1. For Customer by using **Online Distilled Water** application he can buy the distilled water in online hence it will save for customer time.
2. For mineral water provider it is easy to handle product stock and it is easy to handle more customers will orders the mineral water and delivery the mineral water.

3. In proposed System it is easy to maintain sales report for mineral water provider because system will generate automatically.

7. Hardware Requirements:

Hardware	Minimum requirements
Computer	1 GHz minimum, multi-core processor
